FOREWORD

The Department of Water Resources, as Watermaster, is pleased to submit this report on water supply conditions in the Central Basin during the 2000-2001 fiscal year. The report is prepared annually in accordance with the provisions of the Los Angeles County Superior Court Judgment in the Central Basin. The Judgment, together with Part 4, Division 2, of the California Water Code, authorizes this publication and the Department's administration of the Watermaster Service Area.

In 2000-2001, the Parties pumped 196,263 of their 241,485 acre-feet of "Allowed Pumping Allocation". An additional 18,364 acre-feet was left in the ground as in-lieu replenishment and 25,317 acre-feet was kept as carryover.

The report includes information on groundwater extractions, use of imported water and recycled water, replenishment operations, and administration of the Water Exchange Pool, and a financial report on Watermaster Service during the 2000-2001 fiscal year.

The Watermaster wishes to acknowledge and express appreciation for the assistance and support received from the many public and private organizations and individuals whose contributions were essential to this report.

The success of Watermaster Service is dependent on continued cooperation and communication between the Watermaster and the water users.

Charles R. White, Chief
Southern District
and Watermaster

I. INTRODUCTION

The Central Basin is a large groundwater basin underlying the southeastern part of the Los Angeles Coastal Plain. It is bounded on the north by the hills separating it from the San Gabriel Valley, on the east by Orange County, and on the southwest by the West Coast Basin (Figure 1).

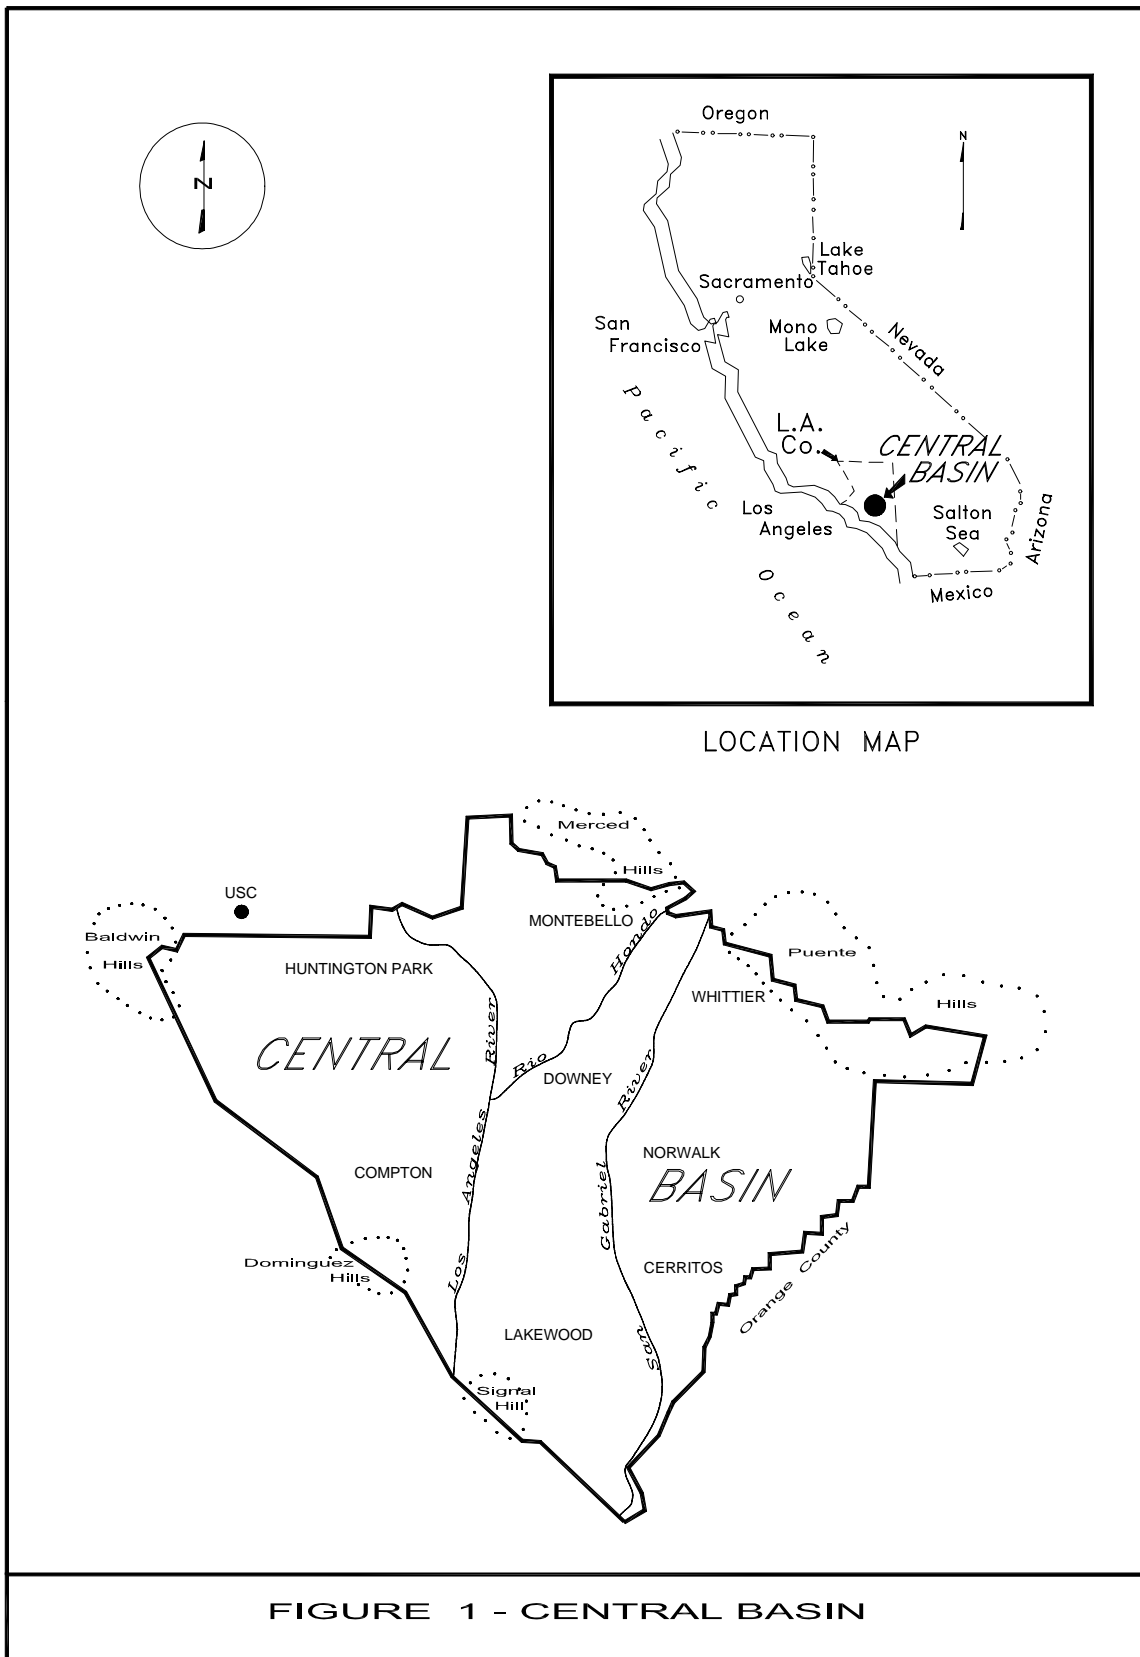

Most of the 277-square-mile Basin is urban-suburban, consisting of 23 incorporated cities. A substantial portion of the water used on the overlying land is pumped directly from the Basin.

Nearly 50 years ago, overdraft of the groundwater basin and declining water levels caused sea water intrusion and threatened the groundwater supply. However, timely legal action and adjudication of the water rights halted the overdraft and prevented serious damage to the Basin. Today, groundwater use in the Central Basin is restricted to the adjudicated rights by a Superior Court Judgment and monitored by a court-appointed Watermaster. The Watermaster's primary duty is to administer the controls prescribed by the Judgment and report annually to the Court and Parties on significant groundwater-related events that occur in the Basin. The Basin has been under the Watermaster since 1962.

Appendix A contains the continuing history of Watermaster Service operations and the duties and functions of the Watermaster.

This report summarizes the Watermaster's work, conditions of groundwater supply, water use, and groundwater replenishment and includes a financial report for the 2000-2001 fiscal year.

There are three parts to the report: (1) Introduction, (2) Summary of Water Conditions and Operations, and (3) Details of Water Use and Operations. This third section contains the figures and tables on water supply, water use, replenishment, and administration costs. The appendixes contain backup data for these tables.

II. SUMMARY OF WATER CONDITIONS AND OPERATIONS

Tables and figures referred to in the text that follows are for Fiscal Year 2000-2001.

Average Rainfall

- 15.30 inches, 109 percent of the calculated 90-year average rainfall on the Coastal Plain.
- Mean seasonal precipitation on the Basin (base period 1897 - 1947) ranges from 12 inches at Long Beach to 16 inches at Whittier Narrows.

Conservation

- Overall replenishment operations decreased by 9 percent, excluding water used for sea water intrusion barrier operations.
- 46,062 acre-feet of storm runoff was recharged, 6,295 acre-feet more this year than last year.
- 23,451 acre-feet of purchased water was spread this year (21,586 less than the amount purchased and spread last year).
- 38 percent of the total water spread was recycled water from three nearby water reclamation plants.

Wells

- 344 active and 227 inactive wells.
- 8 wells drilled and 7 destroyed.

Alamitos Barrier Project Operations (Table 6)

44 injection wells, 4 extraction wells, and 215 observation wells operating.

Water Quality

- The following averages were compiled for 2000-2001. Data were provided by Central Basin Municipal Water District and the Metropolitan Water District of Southern California.

Mean Values Concentrations, in mg/L

<u>Quality factor</u>	<u>Groundwater</u>	<u>Colorado River water at Lake Mathews</u>	<u>State Water Project water at Castaic Lake</u>
Chloride	47	69	59
Sulfate	99	220	52
Hardness (as CaCO ₃)	250	281	121
TDS	425	556	266

Exchange Pool

- There was no request for Exchange Pool water.
- There was no Exchange Pool carryover.

Water Right Sales and Leases

- Sales have reduced number of Parties from 508 (1966-67) to 143 (2000-2001).
- This fiscal year, 94 leases totaling 29,786.44 acre-feet were made.

In-lieu Replenishment Program

- Water Replenishment District of Southern California (WRD), in cooperation with the Metropolitan Water District of Southern California (MWD), continued the in-lieu replenishment program.
- 8 Parties participated in the program for a total of 18,364 acre-feet.

Overextractions

- Fifteen Parties overextracted (plus one non-party). Four were in violation of the judgment: Ashland Chemical Company, Coast Packing Co., Midland Park Water Trust; and St. John Bosco School (Table 3).
- Watermaster has contacted the Parties and they have indicated that they will eliminate their overextractions by leasing water and/or obtaining Exchange Pool water in fiscal year 2001-2002.

California Department of Transportation (Caltrans)

- On July 1, 1997, Caltrans (non-party) started pumping to dewater and to protect an area along the I-105 freeway. Caltrans has pumped 906.03 acre-feet in 1997-98, 1661.72 acre-feet in 1998-99, 1,871.65 acre-feet in 1999-2000, 2,184.95 acre-feet in 2000-2001 and has been disposing of this water to the Los Angeles and San Gabriel Rivers.

Caltrans representatives have been meeting with the Water Replenishment District and with pumpers the last three years to resolve issues involving water rights, replenishment assessments, and disposal of the water including treatment and use by a water utility.

Watermaster is monitoring these discussions toward a resolution of these issues and finding a way that Caltrans can operate within the decree.

Water Use (Tables 1, 12 and Appendix C)

- In fiscal year 2000-2001 extractions were 21,104 acre-feet less than the total Allowed Pumping Allocation, whereas in fiscal year 1990-2000, extractions were 17,014 acre-feet less than the Allowed Pumping Allocation.
- Imports decreased 5 percent. Recycled use declined 11 percent.
- Total water use decreased 4 percent. Parties supplied 417,925 acre-feet to their customers.

Imports (Table 12)

- In fiscal year 2000-2001, a total of 210,988 acre-feet of water was imported to Central Basin.
- Water from the Colorado River and the State Water Project arrives through MWD's facilities for distribution throughout the Basin by the:
 1. Cities of Compton, Long Beach, and Los Angeles;
 2. Central Basin Municipal Water District (CBMWD); and
 3. West Basin Municipal Water District (WBMWD).
- The City of Los Angeles also imports water from the Owens River-Mono Basin.
- California Domestic Water Company, San Gabriel Valley Water Company, Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Basin.

Recycled Water (Table 12)

- Excluding recycled water used to recharge groundwater aquifers of Central Basin, recycled water used amounted to 10,674 acre-feet (a 1,140 acre-foot decrease from last year).

Budget (Table 14)

- Submitted to Parties on September 28, 2000, and adopted as final budget on November 7, 2000.

Apportionment of Parties' Share of Budget (Table 15)

- A 5 percent penalty is assessed if payments become delinquent.
- 10 parties were penalized because their payments were not made within the allowable 30 days after service of the invoice. Two parties have not paid.
- Assessments totaling \$24 were collected for delayed payments.

TABLE 1. SUMMARY OF OPERATIONS

Item	Fiscal Year 1999-2000	Fiscal Year 2000-2001
Parties	148	143
Active pumpers	79	71
Active nonparties	4	4
Allowed Pumping Allocation, (APA) in acre-feet	217,367	217,367
Watermaster expenses	\$ 481,923	\$ 413,365
Watermaster expenses per acre-foot of APA	\$ 2	\$ 1.90
Rainfall, in inches	9.67	15.30
Injection at Alamitos Barrier Project, in acre-feet	4,296	5,282
Spreading operations, in acre-feet	122,956	111,901
Extractions, in acre-feet *	200,353	196,263
Imports, in acre-feet **	221,200	210,988
Recycled water use, in acre-feet ***	11,814 #	10,674
Total water use by Parties, in acre-feet	433,367	417,925
* Excludes nonparties. ** Includes imports of San Gabriel Basin groundwater. *** Excludes amounts used for groundwater recharge. # Value revised from last report.

Meter Testing Program

Accurate measurement of groundwater extraction is essential to the success of the Basin's management plan. The Watermaster intends to test the water meter on every water well at least once every two years. During the 2000-2001 fiscal year, 102 meters were tested.

It is the responsibility of each party to ensure that its meter and test facilities are installed properly and maintained in good working conditions. Test points must be properly installed. In addition to those tested, 32 meters could not be tested because of conditions such as construction, water quality problems, and abandonment.

Meters beyond 5% of standard may be considered faulty and subject to adjustments. If recommended by the Executive Committee of the Central Basin Water Association, Watermaster could make these adjustments to records.

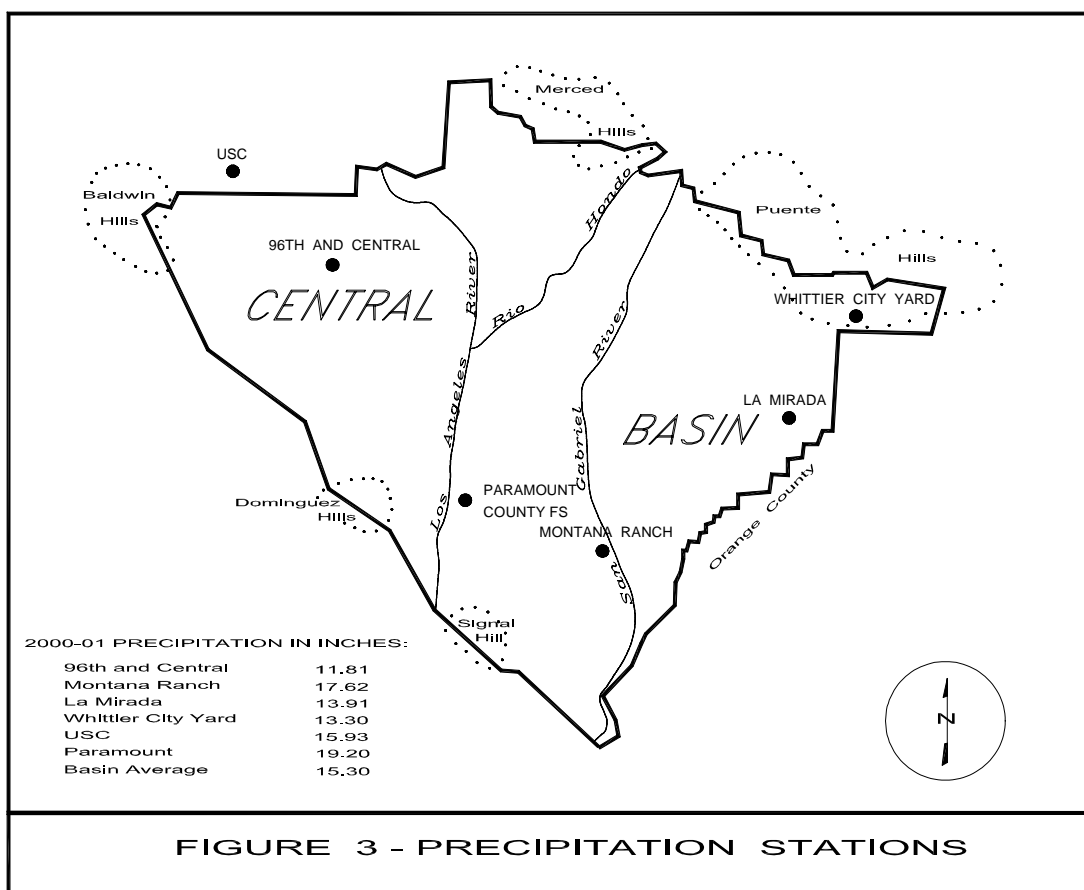

TABLE 5. REPLENISHMENT OPERATIONS
(acre-feet)

Water Source	Quantity	
	1999-2000	2000-2001
Local runoff	39,767	46,062
Recycled water:		
Whittier Narrows Water Reclamation Plant	17,615	7,444
San Jose Water Reclamation Plant	17,093	31,894
Pomona Water Reclamation Plant	3,494	3,050
MWD water purchased with WRD funds	45,037	23,451
Make-up water from Upper San Gabriel Basin	0	0
Total	123,006	111,901
Provisional data provided by Los Angeles County Department of Public Works and Water Replenishment District		

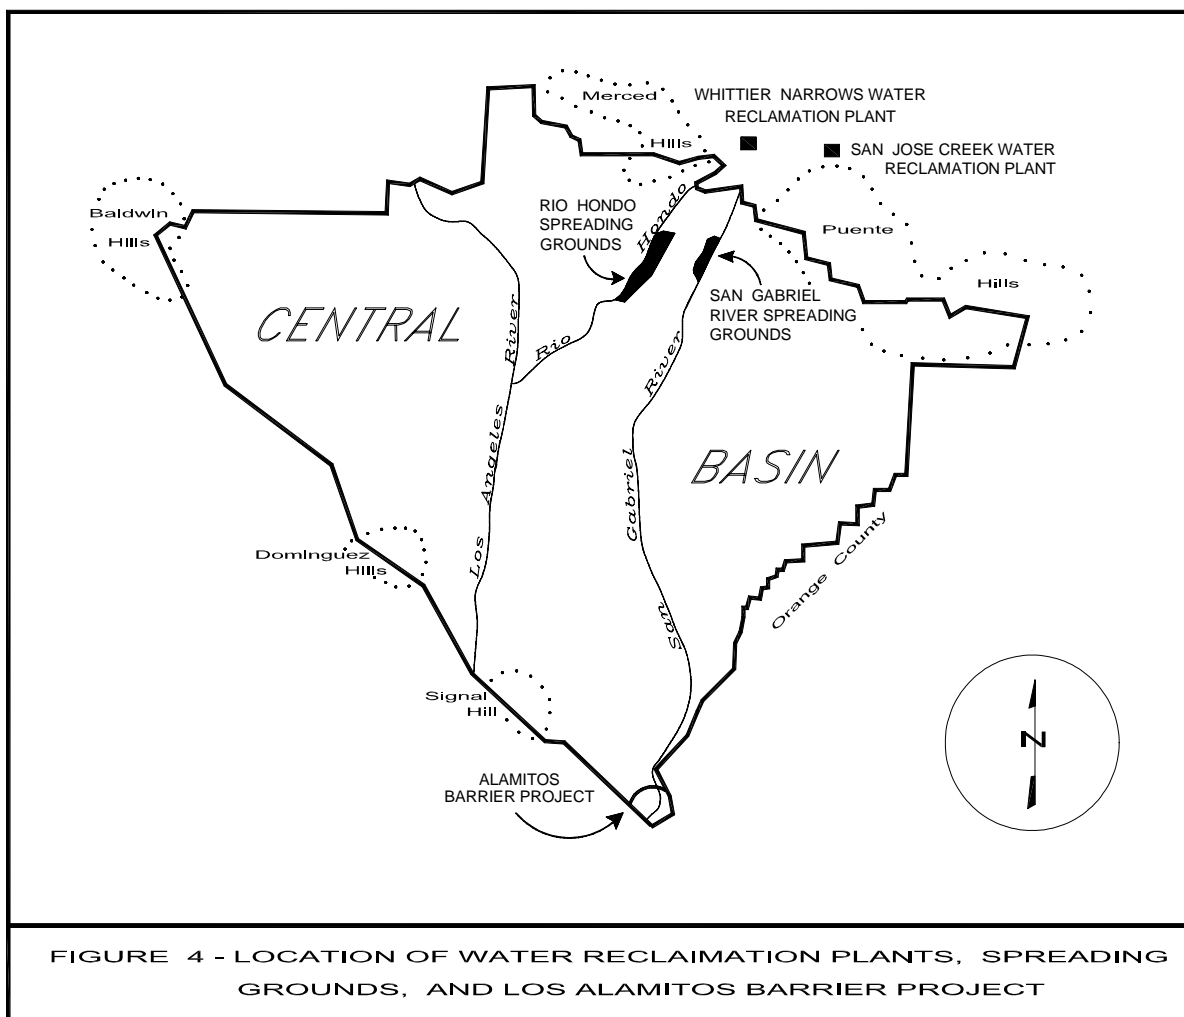

TABLE 6. ALAMITOS BARRIER PROJECT OPERATIONS (acre-feet)	
Item	Quantity
Water injected in 2000-2001, acre-feet	5,282
Water extracted, acre-feet	404
Injection wells	44
Extraction wells	4
Observation wells	215
Information provided by Los Angeles County Department of Public Works.

APPENDIX A

CONTINUING HISTORY OF WATERMASTER SERVICE

History of Water Resources Development

More than one hundred years ago the Los Angeles Coastal Plain was on the threshold of a sharp increase in population. The key to its future was water.

A shortage of sufficient year-round surface water in the Central Basin forced the development of groundwater sources. As early as 1870, water users had tapped the artesian wells and springs east of the Newport-Inglewood Uplift. When those wells stopped flowing, users were forced to drill shallow wells, which supplied enough water to continue development and economic growth.

Groundwater development increased dramatically in 1909 with the advent of the deep-well turbine pump. Its tremendous adaptability and superior operating characteristics placed efficient water wells within economic reach of everyone. In time, reliable water supplies attracted industry and agriculture. Eventually, however, the demand for groundwater exceeded the natural replenishment of the Central Basin.

The overdraft affected the groundwater basin by lowering the water levels and by causing oceanfront areas to be subjected to sea water intrusion.

The deteriorating groundwater situation in the Central Basin and the adjoining West Coast Basin led to the formation of the Central Basin Water Association in 1950, similar to the water association in the West Coast Basin. This led to a plan to:

1. Provide supplemental water to major producers;
2. Limit groundwater extractions from the Central Basin; and
3. Create an exchange water pool to provide groundwater pumping rights for users lacking access to other supplemental water supplies.

Step 1 was realized in 1952 when the Central Basin Municipal Water District was formed to distribute water from the Colorado River. The district was annexed to The Metropolitan Water District of Southern California (MWD) in 1954, and Colorado River water soon flowed into the Central Basin. State Water Project water was first delivered in 1973.

The West Basin and the Central Basin Water Associations were largely responsible for the creation of the Central and West Basin Water Replenishment District (CWBWRD) in 1959. This special district covers 420 square miles of the Central and West Coast Basins (Coastal Plain) of Los Angeles County. Its objective is to replenish and maintain

the groundwater basins by purchasing imported water, recharging the basins, and halting sea water intrusion.

On January 2, 1962, the CWBWRD filed Case No. 786,656 in the Superior Court, County of Los Angeles, naming more than 700 parties as defendants. It sought to obtain quiet title to the right to use groundwater and regulate withdrawals from the Central Basin to protect the water supply from deterioration.

Adverse groundwater conditions and the indefinite period before final adjudication prompted the Central Basin Water Association to draft an interim agreement curtailing extractions from the Basin. By September 1962, the proposed agreement had been approved by a sufficient number of water producers (producers owning over 75 percent of the Assumed Relative Rights within the Basin) to guarantee control over groundwater pumping in the Basin. On September 28, 1962, the Court signed the "Order Pursuant to Stipulation and Interim Agreement and Petition for Order" and appointed the Department of Water Resources (DWR) as Watermaster.

To avoid the protracted litigation experienced by other Watermaster service areas in Los Angeles County, the attorneys representing principal parties held monthly meetings to work out a settlement. A stipulated judgment was drafted. Approval by public utility water companies and other producers represented well over 200,000 acre-feet, 75 percent, of the total rights within the Basin. This was a prerequisite to filing the stipulated judgment with the Court.

A pretrial hearing was held in March 1965, and on May 17, 1965, the case went to trial before Judge Edmund M. Moor. After a week's testimony on engineering, geology, hydrology, and safe yield of the Basin and arguments on water right entitlement, the case was continued to August 25, 1965. Shortly thereafter, Judge Moor appointed DWR as Watermaster. The final Judgment was signed on October 11, 1965 and became effective on October 1, 1966.

The Judgment was amended on March 21, 1980, to provide for a transition in the administrative year from a water year (October 1 to September 30) to a fiscal year (July 1 to June 30). Under the Judgment, this transition in turn contained a "short" administrative year of nine months -- October 1, 1980, to June 30, 1981. The administrative year starting July 1, 1981, was on a fiscal year basis.

The Judgment was again amended on July 9, 1985, modifying the annual budget (\$20 minimum assessment) and exchange pool provisions. The second amended Judgment of May 6, 1991, modified the carryover and overproduction provisions (to 20 percent or 20 acre-feet from 10 percent or 10 acre-feet), defined drought carryover, and provided for exemptions for extractors of contaminated groundwater.

Watermaster Service is administered by DWR in accordance with Part 4, Division 2, of the California Water Code. Watermaster service areas are created by DWR, either at the request of water users or by order of the Superior Court. The first Watermaster

service area was formed in September 1929.

Watermaster Service

Once a month, every groundwater pumper reports its extractions to the Watermaster. This makes it possible to update the water right account (Watermaster Water Production Summary) by computing the amount pumped during the previous month, the amount pumped during the current fiscal year, and the amount that can legally be pumped during the remainder of the year. A copy of the Watermaster Water Production Summary is mailed to the pumper each month.

If electric meter readings are reported along with water meter readings, electric power consumption can be correlated with water production. Erratic or rapidly increasing electric power consumption vs. water production, for instance, may suggest an inefficient pump, system losses, or an inaccurate or malfunctioning water meter.

The Watermaster's field staff schedules tests to determine water meter accuracy on every active well at least once every two years. Accurate measurement of groundwater extractions is absolutely necessary for the success of the Basin's management plan. All available means, including system efficiency tests, are used to confirm water meter test results. Results of each test are furnished to the well owner. If a meter is inaccurate beyond ± 5 percent, it must be repaired within 30 days. Follow-up tests on repaired meters and initial tests on new meters are scheduled whenever necessary. Parties may also request a meter test at any time.

Water Replenishment District of Southern California

The Central and West Basin Water Replenishment District changed its name to Water Replenishment District of Southern California (WRD). WRD is an active water conservation organization in Los Angeles County. It is responsible for replenishing the groundwater supply to both the Central and West Coast Basins.

The creation of water replenishment districts is a statutory procedure established by the Legislature. Division 18 of the California Water Code describes the duties and obligations of such a district, which has powers well suited to solving groundwater problems, whether they be quality- or quantity-oriented.

WRD is comprised of a Board of Directors and a small staff. It is actively engaged in several replenishment programs. These programs, i.e., water spreading, barrier operation, and in-lieu replenishment, are described in this report. WRD also publishes an annual report of its operations. (Additional information may be obtained from its staff, 12621 East 166th Street, Cerritos, CA 90703, phone 562-921-5521).

The Watermaster cooperates closely with WRD because: (1) Watermaster service areas in the Central and West Coast Basins closely match the district boundaries; (2) both WRD and the Watermaster are required to record all groundwater extractions from

the Basins; (3) WRD was the plaintiff in the Central Basin Water Right Case (Case No. 786,656, Superior Court, Los Angeles County); and (4) both WRD and the Watermaster are concerned with the usefulness of the groundwater basins in the Coastal Plain. Many of the Watermaster's data collection programs are coordinated with the WRD to prevent duplication. Hence, monthly or quarterly water well reports are sent to the Watermaster through WRD.

Water from many sources is required to serve the needs of Southern California's thriving urban economy. Water from the Colorado River, Owens River-Mono Basin, and Northern California; runoff from local mountains; local groundwater; and reclaimed water contribute to the water supply system.

Local precipitation on the Basin does not directly influence the recharge of groundwater supply in the Central Basin to any great degree because of a confined aquifer. A layer of impermeable material lies between the surface and the producing aquifers, except in the forebay areas. As a consequence, very little of the rain which falls directly on the Basin reaches the zones where it can be pumped back to the surface.

Groundwater Recharge

Natural replenishment of the Basin's groundwater supply is largely from surface inflow through Whittier Narrows (and some underflow) from the San Gabriel Valley. Some of the water that percolates into the forebay areas of the Central Basin eventually crosses the barrier between the Central Basin and the West Coast Basin and flows into the West Coast Basin.

In the past, outflow and extractions have exceeded natural replenishment, thus upsetting the Basin's water balance. The availability and pricing of imported water also affect the amount of extractions from the Basin. However, extractions do not seem sensitive to MWD price and are fairly constant year to year. Today, attempts are made to reestablish nature's balance by natural and artificial and in-lieu replenishment.

One method of replenishment is water spreading. Water is flooded on areas where it can percolate into the underground aquifers and supplement the natural recharge supply. Large quantities can be returned to the ground by spreading, but the process is limited by the space available for facilities for spreading and the ability of the recharge aquifers to percolate water back to the Basin. Imported water purchased from MWD and recycled water from Whittier and San Jose Treatment Plants are used for artificial recharge.

In-lieu Replenishment

During the 1965-66 water year, WRD began a program of in-lieu replenishment. The program is authorized by Section 60230 of the California Water Code. In effect, WRD was given the power to contract with any producer having access to supplemental water that can be used instead of pumping water from the ground.

The program may be used to: alter pumping patterns within a groundwater basin; replenish areas of low transmissivity where conventional recharge techniques are ineffective; heighten the effect of injecting water to form a sea water barrier by reducing extractions in the vicinity; reduce the amount of replenishment water purchased by WRD; and reduce the annual extraction from a groundwater basin (See Table 11).

Alamitos Barrier Project

The Alamitos Barrier Project (Figure 4 and Table 6), designed to prevent sea water intrusion into the fresh water aquifers of the Central Basin, is of great importance to water users in the Central Basin.

Sea water intrusion at the mouth of the San Gabriel River (Alamitos Gap) poses a serious threat to the groundwater supply. This area has seven water-bearing zones identified in downward order as Recent aquifer, C Zone, B Zone, A Zone, I Zone, Main (Silverado) aquifer, and Lower Zone (Sunnyside) aquifer.

Sea water intrusion occurs through the Recent aquifer, which is very permeable and open to the sea. The C, B, A, and I Zones merge with the Recent aquifer and are, therefore, susceptible to intrusion, as can be noted by the varying degrees of salinity occurring in the water found in each zone. The saline water intrusion has been detected as far as 10,000 feet landward of the Newport-Inglewood fault zone and, if unchecked, could extend into the Silverado and Sunnyside aquifers, which are the principal groundwater-producing zones in the Basin.

The Los Angeles County Department of Public Works operates a barrier comprised of a saline water extraction trough and a fresh water injection pressure ridge to halt intrusion. In addition to the extraction wells and injection wells required, a number of observation wells are also part of the project. These provide data along the barrier and are used to monitor groundwater levels and water quality in this area.

The information from this monitoring program will be utilized in determining if additional barrier facilities are necessary. Since operation of the barrier began in 1965, the sea water intrusion problem has been contained.

Basinwide Water Quality Monitoring

In compliance with Title 22 of the California Administrative Code, the Central Basin Water Association is involved in a basinwide plan to monitor the quality of water being pumped for domestic use.

Primary enforcement responsibility of the 1974 National Drinking Water Act, as embodied in the National Interim Primary Drinking Water Standards, was given to the states. California has assumed primary enforcement responsibility through passage of Senate Bill 1078, signed by the Governor in October 1976.

Groundwater Levels

Every water well owner in the Central Basin is concerned with groundwater levels because the cost of pumping water is largely dependent on the distance it must be lifted. Energy costs have risen dramatically and are expected to continue to rise in the foreseeable future.

Figure 6 shows water level information in the form of selected hydrographs. The hydrographs are representative of water levels in wells producing from several aquifers underlying the Basin. Additional water level information is contained in WRD's annual report.

Prior to 1961, groundwater from the Basin satisfied most of the demand. However, the Judgment reduced extractions to 217,367 acre-feet annually, so imported water has become a major component of the area's water supply.

Figure 7 illustrates the groundwater extractions and imported water use from 1957-58 to the present, less San Gabriel Valley imports. Much of the increase in demand for imported water during the mid-1960s may be attributed to the curtailment of groundwater extractions. The early 1970s saw a leveling off in this demand for imported water which continues today.

Groundwater Extractions

The Central Basin Judgment limits the amount of groundwater each party can extract annually from the Basin (July 1 of one year through June 30 of the following year). (See Appendix B.) This limit is referred to as the "Allowed Pumping Allocation" (APA). Recipients of Exchange Pool water may pump the amount released to them in addition to their APA.

The metered groundwater production from each active well in the Basin is listed by Party in Appendix C. Normally, water wells producing less than 25 acre-feet per year do not require a meter and may be reported on a quarterly basis. Appendix C lists parties and nonparties reporting quarterly. Wells where groundwater was extracted are shown on Plates 4 and 5.

To provide flexibility in the control of groundwater extractions, the Judgment contains provisions allowing the parties to carry over into the succeeding water year a portion of their unused water right and in some cases to overextract. This flexibility was necessary to meet unforeseen emergencies in water demand.

One provision allows parties to carry over from one water year to another any unused APA not to exceed 20 percent of their APA or 20 acre-feet, whichever is greater*. In

*This provision of the judgment was amended to permit all parties full 100 percent carryover from 1976-77 and 1977-78 because of the drought.

addition, any unused Exchange Pool water can be carried over into the following fiscal year.

Parties are also allowed to overextract by 20 percent of their APA or 20 acre-feet, whichever is greater. Under certain circumstances, parties may overextract in greater amounts; however prior approval by the Watermaster must be obtained. In any case, the overextraction must be made up the following fiscal year unless Watermaster grants a relief due to an unreasonable hardship; such relief shall be prorated over a 5-year period.

Water Well Identification

A State Well Number identifying water wells in the Central Basin is derived from a system based on the U. S. Public Land Survey. Each number consists of township and range designations, a section number, a letter representing the 40-acre tract in which the well is situated, a sequence number indicating the chronological order in which the well number was assigned, and a letter representing the base and meridian. The last letter is frequently omitted from well numbers in a single area because all wells there share a single base and meridian. The components of Well 3S/11W-12C03S, for example, are identified in Figure 8.

Well numbers are assigned and recorded by the Watermaster. In addition, information on each well shown on Plates 4 and 5 is maintained in the Watermaster's office.

ADMINISTRATION OF JUDGMENT

The Central Basin Judgment contains provisions for the parties to obtain additional pumping rights, exceed entitled extractions, or make variations in annual pumping. The procedure thus established is described below.

Exchange Pool

The Court and parties foresaw that adjudicating the water rights in the Central Basin and limiting the total extractions would not suffice all parties. For this reason, Part III, Subpart C of the Judgment authorizes an Exchange Pool to provide additional water rights for parties without a supplementary supply.

On or about July 1 of each year, the Watermaster mails an Exchange Pool form to each party, requesting that the form be completed and returned to the Watermaster by August 9. The form provides for making: mandatory offers of water rights to the pool, referred to as "Required Subscription" in the Judgment; "Voluntary Subscription"; and requests for water rights from the pool. In completing the form, the member must estimate his water needs and supply for the, ensuing fiscal year.

Requests

A request for Exchange Pool water rights may be made when a Party's estimated needs exceed its total supply, including leases. A Category (a) Request is defined as that quantity requested by a member not in excess of 150 percent of his APA or 100 acre-feet, whichever is greater. Category (b) Requests are those which exceed the 150 percent or 100-acre-foot limitation. Whenever there are insufficient Voluntary Subscriptions to meet all Category (a) Requests, Required Subscriptions may be used. All Category (a) Requests shall be filled first before any Category (b) Requests are filled. Category (b) Requests are filled first by any remaining Voluntary Subscriptions before the Required Subscriptions are used.

A Required Subscription can be made to the pool when a member has a connection to supplementary water and can obtain imported water from MWD or the Central and West Basin Municipal Water District. The Required Subscription is limited to 20 percent of the member's APA, except that the Required Subscription, plus the party's water needs for the year, cannot exceed the party's total supply.

A Voluntary Subscription can be made by any member of the Exchange Pool. The only requirement is that the member's supply must exceed his estimated needs and only the difference may be offered.

However, the Watermaster must first allocate all the Voluntary Subscriptions before using the Required Subscriptions in filling Category (a) Requests and Category (b) Requests.

Experience has shown that Voluntary Subscriptions have always been sufficient to meet all the Category (a) Requests; as a result, no Required Subscriptions have been used to fill Category (a) Requests. It is doubtful whether Required Subscriptions will ever be used to meet Category (a) Requests.

The price charged for Exchange Pool water rights is fixed by Part III, Subpart C, Paragraph 10 of the Judgment. This provision was amended by the Court order on July 9, 1985. The price is now based primarily on: (a) the weighted daily normal price as of the beginning of the administrative year charged by the Central Basin Municipal Water District for treated MWD water used by the exchangers during the preceding fiscal year (July 1 - June 30); (b) less the incremental cost of pumping water in the Basin at the beginning of the administrative year determined by Southern California Edison Company's schedule PA-1 rate multiplied by 560 kilowatt-hours per acre-foot rounded to the nearest dollar; and (c) less the current replenishment assessment. Because item (a) varies among exchangers and items (b) and (c) vary from year to year, the cost of Exchange Pool water will likewise vary among exchangers and from year to year.

Exchange Pool Carryover

The Central Basin Exchange Pool provides additional pumping rights to parties at a

relatively high price. The authors of the Judgment therefore believed that the parties should be allowed to pump their entire exchange-water-right purchases, regardless of the provisions limiting carryover of water rights. Therefore, a specific exchange water carryover provision was drafted and included in the Judgment.

The provision specifically allows a party who purchased exchange water to carry over the unpumped portion of his allowable extraction into the next succeeding administrative year. The charge is authorized by the Judgment and is based on the difference in the prices of Exchange Pool water between the year the water was purchased and the succeeding year.

Transfers of Allowed Pumping Allocations

The Central Basin Exchange Pool is not the only method of obtaining additional pumping rights. Each water year, there are many water-right leases and sales between parties.

In Appendix B there are also recorded sales of water rights between parties and the current ownership of Allowed Pumping Allocations by each of the parties as of June 30.

Suggested samples of water right lease and sale agreements are illustrated in Appendix B. The Watermaster recommends that all documents be prepared on an 8-1/2 x 11-inch sheet of paper. Any necessary additions to the recommended agreement may be attached on another page. These sample documents do not have to be used, but they are sufficient for most purposes.

When property on which water rights have been developed is sold, the Watermaster must be furnished a copy of the sale document. The sale document is required for the proper accounting of the water rights. The Watermaster assumes that the water rights pass to the new owner unless specifically reserved in the sale document.

In leasing, buying, or selling water rights, parties should be specific as to the type being exchanged, i.e., Total Water Right or Allowed Pumping Allocation. All leases should be entered into on the basis of Allowed Pumping Allocation, whereas sales should specify both amount of Total Water Right and amount of Allowed Pumping Allocation, each to the nearest whole acre-foot. All water-right leases should be made on a fiscal year basis, i.e., July 1 through June 30 of the following year.

The Watermaster keeps a list of parties who have informed him of their interest in buying, selling, or leasing water rights. Any party wishing to be listed should call the Watermaster. This is not done as a Court-required function. It is an informal courtesy established to assist parties unable to resolve problems regarding an excess or deficiency of water rights. The Watermaster will make no recommendation regarding transactions conducted relative to the use of this service. The names of all parties using this service are available in the Watermaster's office and may be obtained by telephone or visit to the office.

Overextractions

Each year some parties extract more groundwater from the Central Basin than they are entitled to. The overextractions are usually small, within the tolerance set by the Judgment. Each party may overextract by 20 acre-feet or 20 percent of its Allowed Pumping Allocation, whichever is greater, on the premise that the overextraction will be eliminated during the following fiscal year. Any overextractions above this limit must have prior approval of the Watermaster. Most overextractions are caused by unexpected increases in water demand, so it would be unreasonable not to allow some deviation from the limits and guidelines of the Judgment.

Findings and Determinations by Watermaster

From time to time, the Watermaster evaluates historical groundwater production records of parties at the request of the parties or at the Watermaster's discretion. In some instances, the evaluations and findings result in minor uncontested changes in the records, which may be to the benefit or detriment of the party.

Carryover of Allowed Pumping Allocation

The provision in the Judgment (Subpart A, Part III)** relative to allowable carryover of unused water rights states in part: "Each party ... who ... does not extract ... a total quantity equal to such party's Allowed Pumping Allocation for the particular Administrative year ... is permitted to carry over from such Administrative year the right to extract from Central Basin in the next succeeding Administrative year so much of said total quantity as it did not extract not to exceed 20% of such party's Allowed Pumping Allocation, or 20 acre-feet, whichever ... is the larger." (Underlining added.)

The method of computing the carryover and allowable overextractions was changed, effective in the 1972-73 fiscal year. It is now assumed that when not specifically passed to the lessee by the lease document, the amount leased is not deducted from the lessor's Allowed Pumping Allocation for computing the carryover or allowable overextraction. All future lease documents must contain a statement as to which party receives the benefit of the amount leased for computing carryover or overextractions. Item (5) in suggested Water Right License and Agreement is sufficient for this requirement (see Appendix B).

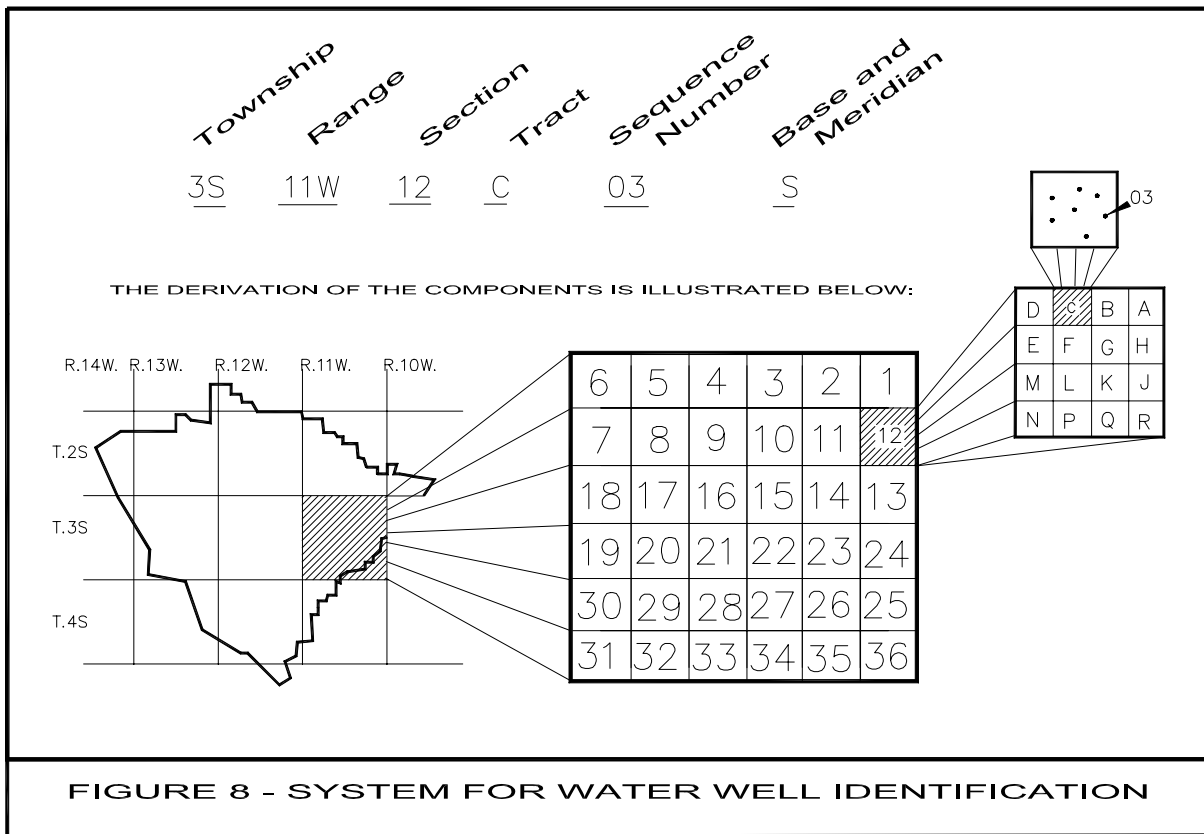

Cost of Watermaster Service

The Judgment requires that the Watermaster prepare and mail a copy of the tentative budget to each of the parties at least 60 days before the beginning of each fiscal year. If no objections are received within 15 days after submitting the budget, it becomes final.

** This provision of the Judgment was amended because of the drought to permit all 206 parties full carryover for the 1976-77 and 1977-78 fiscal years.

The administrative cost chargeable to the parties was apportioned among the parties as directed by the Judgment. The Judgment provides that, if the amount to be assessed to each party of the final budget is equal to or less than \$20 per party, the cost shall be equally apportioned among the parties. However, if the party's share of the budget is greater than \$20, each party will be assessed a minimum of \$20 and the total amount collected will be deducted from the parties' share of the budget. The balance to be collected is then assessed among the Parties in proportion to their Allowed Pumping Allocations.

APPENDIX B

SUCCESSION OF ALLOWED PUMPING ALLOCATION IN CENTRAL BASIN, JUNE 2001

SUGGESTED SAMPLES OF DOCUMENTS FOR TRANSFERRING WATER RIGHTS

YEARLY LEASE	PERMANENT TRANSFER
<p style="text-align: center;"><u>WATER RIGHT LICENSE AND AGREEMENT</u></p> <p>For a valuable consideration, THE JOHN DOE COMPANY hereby grants to JOHN SMITH: a license to extract _____ acre-feet of Licensors Allowed Pumping Allocation allocated to Licensors (or predecessors in interest) under and pursuant to Judgment dated October 11, 1965, and entered in Los Angeles Superior Court Case No. 786,656 entitled "Central and West Basin Water Replenishment District vs. Charles E. Adams, et al." during the period commencing July 1, 20____ and continuing to and including June 30, 20____.</p> <p>Said License is granted subject to the following conditions:</p> <p>(1) Licensee shall exercise said right and extract the same on behalf of Licensors during the period above specified and put the same to beneficial use and Licensee shall not by the exercise hereunder of said right acquire any right to extract water independent of the rights of Licensors.</p> <p>(2) Licensee shall pay assessments levied on the pumping of said ground waters by the Water Replenishment District of Southern California.</p> <p>(3) Licensee shall notify the District and the Watermaster that said pumping was done pursuant to this license and provide the Watermaster with a copy of this document.</p> <p>(4) Licensee shall note, in any recording of water production for the period of agreement, that said pumping was done pursuant to this license.</p> <p>(5) Licensee's Allowed Pumping Allocation _____ (shall) _____ (shall not) be increased by the amount hereby leased when computing carryover or allowable overextraction as provided by Part III, Subpart A and B in said Judgment.</p> <p>THE JOHN DOE COMPANY warrants that it has _____ acre-feet of Allowed Pumping Allocation and that it has not pumped and will not pump or permit or license any other person to pump any part of said _____ acre-feet during the period of July 1, 20____ through June 30, 20____.</p> <p>Dated: _____</p> <div style="display: flex; justify-content: space-between; margin-top: 20px;"> <div style="width: 45%;"> <p>JOHN SMITH</p> <p>By _____</p> <p>Title _____</p> </div> <div style="width: 45%;"> <p>THE JOHN DOE COMPANY</p> <p>By _____</p> <p>Title _____</p> </div> </div>	<p style="text-align: center;"><u>DEED OF WATER RIGHTS</u></p> <p>For a valuable consideration, JOHN SMITH hereby sells and transfers to THE JOHN DOE COMPANY:</p> <p>The Right to extract _____ acre-feet of grantor's Allowed Pumping Allocation (_____ acre-feet of Total Water Right) allocated to grantor (or predecessors in interest) under and pursuant to Judgment dated October 11, 1965 and entered in Los Angeles Superior Court Case No. 786,656 entitled "Central and West Basin Water Replenishment District vs. Charles E.
